DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by "said plurality of magnet lines also serve as said conductive member". Are applicants saying the magnet lines constitute a conductive member?

Allowable Subject Matter

3. Claims 1-2, and 4-10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Although the combination of a plasma chamber; a pulling out electrode; a neutralizing cell; means to separate charged particles from an ion beam to form a neutralized beam that can include a multi-aperture electrode; and a process chamber is known in the prior art, as seen in Springer (654), Kubota (629), Kinoshita (572), and JP 100083899 A, the further use of a plurality of multi-pole magnets adjacent the ion separating means, is considered novel in the art.

Also considered novel is not only the above combination, but further having a negative potential applied to the plasma generation cell wall and the neutralization cell wall.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ichimura (987) and Ogura (625) have cited to show other similar devices.

6. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
